Mobile : +91 9569335185
Location : Lucknow, Uttar Pradesh

CAREER OBJECTIVE

- Dedicated B.Tech student specializing in Artificial Intelligence, with experience in full-stack web development and computer vision. Passionate about applying AI models and robust backend architectures to solve complex, real-world problems.

EDUCATION

Babu Banarasi Das University — Lucknow, India
B.Tech – Computer Science Engineering (Spec. in AI); CGPA: 7.0 — *2023 – 2027*

- **Relevant Courses:** DBMS, Neural Networks, Data Structures & Algorithms

SKILLS SUMMARY

- **Languages** - Python, Java, JavaScript, TypeScript
- **Web Technologies** - HTML, CSS, React, Next.js, Django, Node.js, Vercel, Netlify
- **AI/ML** - MediaPipe, OpenCV, Neural Networks, YOLOv8
- **Databases** - MySQL, PostgreSQL
- **Tools & Platforms** - Git, GitHub, VS Code, AWS EC2, Docker

EXPERIENCE

Social Summer of Code — Remote
Open Source Contributor — *Jun 2026 – Jul 2026*

- Contributed to multiple open-source repositories by creating new features and resolving complex bugs using Python and TypeScript, impacting 50+ end users.

Elite Coders — Remote
Open Source Contributor — *Jul 2026 – Aug 2026*

- Optimized core components for GitPhone and Crypto Viz, successfully merging 20+ pull requests to enhance overall system functionality and stability.

PROJECTS

- **Project NETRA (Adaptive Traffic Management)**
  - Architected an adaptive traffic management system utilizing YOLOv8 computer vision to dynamically prioritize emergency vehicles, reducing simulated wait times by 25%.
  - Managed model training and logic implementation to analyze real-time video feeds for intelligent traffic routing with 95% detection accuracy.
- **AI Virtual Mouse**
  - Programmed a gesture-controlled mouse interface leveraging Python and MediaPipe, achieving sub-50ms response times for hand-gesture-based cursor control.
  - Implemented real-time hand tracking to replace physical mouse functions, integrating computer vision techniques via OpenCV.
- **HealthCare Portal**
  - Built a full-stack healthcare management portal using Django, streamlining patient life cycles, doctor scheduling, and pharmacy inventory for up to 100+ concurrent users.
  - Formulated robust modules including vital sign tracking, appointment workflows, and automated stock deduction backed by a PostgreSQL database.
  - Deployed the server-rendered application to Vercel, utilizing Mangum for ASGI routing and WhiteNoise for static file serving.

CERTIFICATION

- **Hack2Skill** - #WhichStateAmI Challenge Participant
- **GRASTech (at BBD University)** - 90-Hour Project-Based Summer Training on AWS & Cloud Computing

LEADERSHIP & EXTRACURRICULARS

- **Smart India Hackathon (SIH) 2025 Participant** – Competed in the prestigious national-level hackathon, spearheading a solution for image-based breed recognition for cattle and buffaloes of India.
- **Open Source Contributor** – Actively participated in GirlScript Summer of Code (GSSoC) and Elite Coders Summer of Code (ECSoC) 2026.
